

**HEX**  
HUMAN EXCHANGE

# What is this?

HEX (HUMAN EXCHANGE) is a new generation digital platform that will provide an opportunity to invest in the future financial results of serial entrepreneurs\* and company founders for 20 or 40 years.

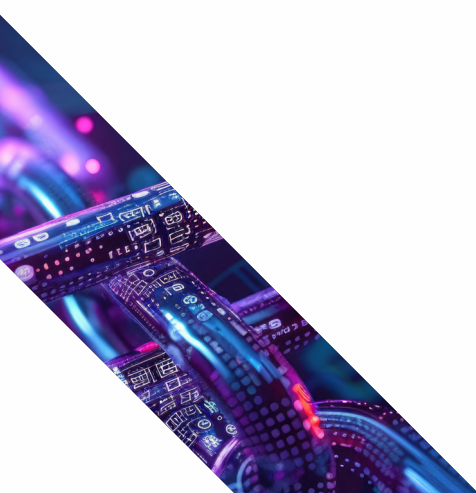

**We are creating a new category in assets - Human Activity Assets (HAA).**

- Serial entrepreneurs are those who launch multiple businesses over the course of their career.
- 

# Why did we start this?

We believe in the Real World Assets (RWA) trend.

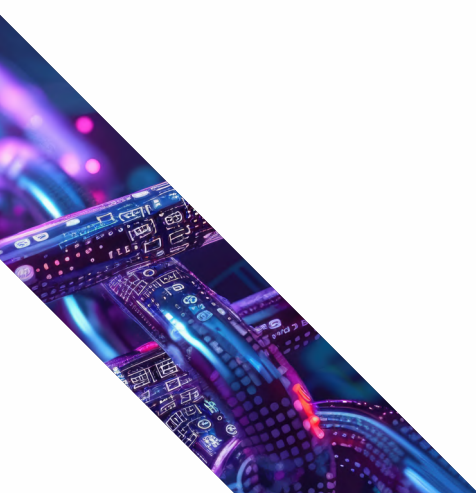

Our values are innovation, financial literacy and education, so we invest only in entrepreneurs who are involved in innovation, finance, education and applied science.

# What is this for?

We think in terms of a new paradigm for investing and preserving assets.

We are focused only on the long term. And we believe that investing in the activities of young entrepreneurs at the beginning of their entrepreneurial journey will make it possible to fairly distribute the wealth of generations and maintain the impulses for the development of humanity.

# What is the scheme?

We will provide an opportunity to invest in the activities of entrepreneurs.

Investments are made through the HEX Fund, registered and regulated in Switzerland, which holds 5 to 10% of Enterpriner's Co (the entrepreneur's company), which will receive income from the entrepreneur's activities for a period of 20 to 40 years.

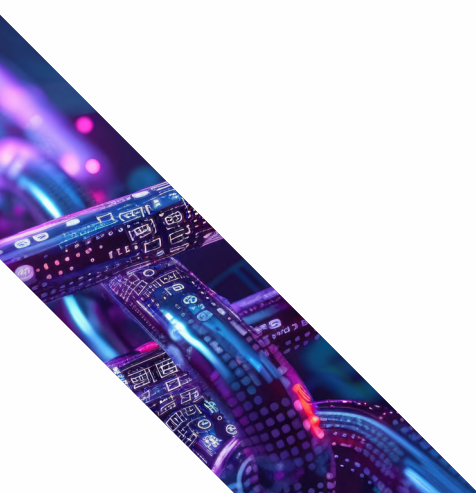

HEX Fund issues a digital record that formalizes the activities of the entrepreneur and places it on the digital platform HUMAN EXCHANGE.

# There is an idea to have a physical device.

We will create a simple, single physical device in which you can store and control your digital assets and investments.

An investor in the HEX Fund will be able to buy or receive as a gift a Digital wallet/tablet for storing and monitoring the fund's assets.

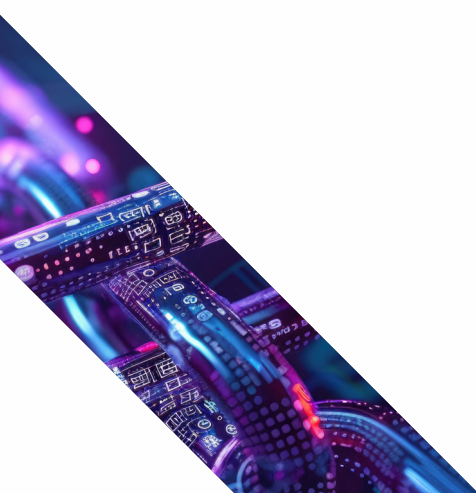

# Which entrepreneurs does the fund invest in?

Economic model for selecting entrepreneurs.  
The selected entrepreneur must meet the following criteria.

- I already have one experience of starting a business.
  - There is a cash flow generated over a period of 2 years.
  - Areas of interest in entrepreneurship: innovation, finance, education and applied science.
- 

# What is the expected return of the fund.

The fund strives to provide an average annual investment return of 4% more than the inflation rate\*

- The inflation rate means the retail price index in the current period, weighted by the regional coefficient.
- 

## Founders team.

**Filipp Lodochnikov** is a serial entrepreneur whose main background is in the creation and repair of microelectronics.
